Playstore app review analysis

Program Feedback

It was great experiance , that I learnt lot of things that I don't know till know and the faculties are have amazing talent in explaining the topics .

Project Short Summary

The Play Store App Review Analysis project provided insights into app performance and user preferences, highlighting popular categories and high-engagement apps. Advanced sentiment analysis and interactive dashboards were recommended for deeper feedback interpretation and real-time monitoring. User segmentation can offer personalized insights for targeted improvements and marketing strategies.
